Tripod Technologies, LLC among South Jersey's Top 25 Companies.

Philadelphia, June 13th, 2006 – Philadelphia Business Journal has named Tripod Technologies, LLC one of the top 25 fastest growing companies in Southern New Jersey. The top 25 results were ranked by researchers at Rowan University's Rohrer College of Business. The award recognizes the company's achievement in increasing their revenue by 137.92% between 2003 and 2005.

The Cherry Hill, NJ based Tripod Technologies, LLC makes the top 25 list as the 8th fastest growing company based on its growth during the determined time frame.

"Since it's founding in 2002 Tripod Technologies, LLC has enjoyed great growth by focusing on delivering value to our customers' investment in IT services," said Badri Nittoor, CEO. "Tripod employs multiple engagement models that bring the right blend of people and processes to fit our customer's needs. The adoption of open source software for infrastructure and middleware, especially in the mid-market to large sized companies plays well to our strengths and represents a strong growth area for Tripod Technologies, LLC".

The criteria for the companies included being located in the eight South Jersey counties: Atlantic, Burlington, Camden, Cape May, Cumberland, Gloucester, Ocean, and Salem. Additionally, the companies must have a three-year sales history with an increase in fiscal 2005 and sales at or more than \$75,000 in fiscal 2003.

"In its 11th year, the South Jersey 25 has emerged as a great way to discover and track the progress of some of the region's fastest growing companies," said Bernard Dagenais, editor of the Philadelphia Business Journal. "These companies have impressive stories to tell about fields as varied as health care, technology, construction and communications. They represent jobs, dollars and some of the best entrepreneurs that South Jersey has to offer."

The twenty-five companies are profiled in a special supplement of the Philadelphia Business Journal issued June 16.
